

March 24th, 2008

Dear Mayor Reed,

As you know, we have recently relocated from out-of-town to our new manufacturing facility in south San Jose. SoloPower chose to relocate to San Jose because, among other reasons, we felt that we would have a strong partner in the City. On behalf of SoloPower, I would like to take this opportunity to officially thank the City and its staff for helping make the permitting process quick and smooth. Most notably, we were able to obtain our Conditional Use Permit (CUP) in less than two months, and we were able to take advantage of the City's Special Tenant Improvement program which only took a matter of days. We at SoloPower greatly appreciate all of the effort and hard work by the City staff that has made this possible. As we work to meet the renewable energy demands of today and tomorrow we are glad to have such a strong partner in the City of San Jose that shares a vision for a green future.

Sincerely,

Homayoun Talieh
President and CEO
