

ULTRATECH, INC.

At the November 2, 2004 City Council meeting, Mayor Ron Gonzales and Councilmember Chuck Reed will recognize and commend Ultratech, Inc. as a leader in existing and growing technology markets and a pioneer in new and emerging technology markets which include semiconductors, nanotechnology and thermal processing technologies.

Ultratech, Inc., founded in 1979, and whose corporate headquarters is located at 3050 Zanker Road in North San Jose, designs, manufactures and markets photolithography equipment used worldwide in the fabrication of semiconductor and nanotechnology devices and has pioneered laser processing technology for IC manufacturing.

In the face of intense global competitiveness, Ultratech, Inc. continues to retain and expand its manufacturing facilities in North San Jose, generates hundreds of R&D, office and manufacturing jobs for San Jose and Silicon Valley residents, and inspires young and experienced engineers alike to seek careers in the semiconductor industry.

A few quick highlights that Ultratech executives are really proud of:

- The company is celebrating its 25th anniversary in the business;
- Their business model expanding from semiconductors to nano to emerging technologies;
- The company has recently been honored with the 9th Safety Award from Worker's Compensation Carriers, upholding its reputation as one of the safest companies to work for in the Silicon Valley and throughout the United States
