/ SAN JOSE JUMPS INTO TOP 10 "REAL ESTATE PROSPECTS" IN U.S.

#WhySJ

In just one year, San Jose moved from #18 in the US for "overall real estate prospects" to #8, while San Francisco dropped to #27 from #10.

This is according to the 2018 Emerging Trends in Real Estate Report issued by Price WaterhouseCoopers and the Urban Land Institute.

The report cites Adobe’s planned addition of a fourth tower to its campus, doubling its downtown San Jose workforce, along with Google’s interest in developing eight million sf in the Diridon Station area. The revival of restaurant and retail is noted as a key factor in attracting the millennial workforce that employers are pursuing.

Another development in San Jose’s favor is expanding transit options including the extension of BART, electrification of Caltrain and the advent of High Speed Rail.

For more information on San Jose development opportunities, contact Chris Burton, Senior Business Development Manager, OED.

CORPORATE NEWS

/ SJ AUTO ECOSYSTEM EXPANDS WITH OPTIS LABS

#BuiltInSJ

In auto design, reducing design time is critical. Long dependent on clay models and Styrofoam mock-ups to refine exterior and interior design,
car design has been a labor- and resource-intensive part of bringing a new model to market. A French software company that specializes in managing light and optics is bringing virtual and augmented reality techniques to car design. **OPTIS** has opened a five-person lab facility at the Prospect Silicon Valley facility in San Jose.

The grand opening of the Optis Lab was celebrated by Mayor Sam Liccardo and County Supervisor Cindy Chavez, hosted by Chris Grieves, Optis' West coast manager.

For the last several months, Optis' West Coast team has been working out of an office near Mineta San Jose International Airport, but the plan is to grow to 30 people in the next two to three years, Grieves said.

The company has two products: software that simulates light movement in a car's environment, and software that produces a virtual version of a car's environments and interiors. That includes indoor and outdoor lighting, reflections, visibility of switches, materials and dials.

**/ AEROSPACE FIRM VECTOR EXPANDS INTO SAN JOSE**

#BuiltInSJ

**Vector**, a nanosatellite launch company comprised of new-space and enterprise software industry veterans, is opening a new office in San Jose, to expand its current business operations throughout the West Coast, at 100 Century Center Court in North San Jose. The new facility is the company’s first office addition since beginning operations in 2016 and will house a software engineering team responsible for the development of satellites for GalacticSky.

"San Jose has not been home to a launch vehicle company since the 1960s and with our new office, we are excited to bring aerospace back to the area," said Shaun Coleman, Chief Sales and Marketing Officer of Vector.

**DOWNTOWN DEVELOPMENT**
GROUND BROKEN FOR SJ’S TALLEST TOWERS

Formerly known as SJSC Towers, MIRO, a two-tower residential project located across from City Hall on East Santa Clara Street, broke ground on November 11, 2017. On the site of the iconic Pacific Car Wash, the MIRO towers will be the tallest buildings in San Jose.

Mayor Sam Liccardo, center, participates in MIRO groundbreaking

According to owner Bayview Development Group, the 28-story towers at 167 E. Santa Clara St. will include 600+ residential units and about 20,000 square feet of commercial and retail space when it is completed in 2020.

The buildings, totaling 1 million sf of new construction, will include a mix of one-, two- and three-bedroom units, including 16 penthouses and amenities, like a rooftop pool, fitness, spa and pet facilities and concierge services.

Suffolk Construction is the general contractor and Steinberg Architects is the architect on the project.

For more information on downtown projects, contact Blage Zelalich, Downtown Manager, OED.

TALENT

GUEST BLOG - 25 WAYS TO ATTRACT STUDENT TALENT

Alyssa Lynch is Superintendent of San Jose's Metropolitan Education District (MetroEd). In October, she helped OED and
Silicon Valley Organization conduct two days of manufacturing facility tours for more than 800 area high school students, as part of Manufacturing Day San Jose 2017.

She wrote this guest blog post on strategies for companies to attract young talent.

For more on San Jose workforce development, contact Jeff Ruster, Director of Strategic Partnerships, OED.

INNOVATION

/ KIKA BRINGS EMOJIS AND MORE TO SAN JOSE

#DTSJ

Kika Tech is certainly all about emojis, with one of the most popular emoji keyboard apps for both Android and Apple. The company, newly located to offices in downtown San Jose, has also signed deals with huge entertainment properties such as Wonder Woman and FC Barcelona.

Read the OED blogpost for details on the company and its explosive growth in the U.S.

For more information, contact Nathan Donato-Weinstein, Business Development Officer, OED.

LIFESTYLE

/ BURNING MAN ARTWORK IN DOWNTOWN SAN JOSE

#DTSJ

For the next three months, City Hall is the site of Sonic Runway, 450 feet of pulsing hoops of LEDs creating a tunnel of light and sound between 4th and 5th Streets along East Santa Clara Street.
The installation is a joint project of the City of San Jose Office of Cultural Affairs and Burning Man Project, and is the first artwork for the Playa to Paseo initiative.

Sonic Runway was created for Burning Man by Rob Jensen and Warren Trezevant, and is designed to help people experience the relative speeds of sound and light - music at one end drives waves of color along the runway of lighted hoops, creating a new understanding of how we deal with our eyes seeing something before our ears catch up.

The artwork will be activated every evening through early 2018. See KTVU’s coverage for the excitement of the art work’s opening night.

For more information, contact Kerry Adams Hapner, Director of Cultural Affairs

REAL ESTATE OPPORTUNITIES

/ AVAILABLE IN NORTH SAN JOSE
